

Keychain Type Laser Pointer

6311300

OWNER'S MANUAL — Please read before using this equipment.

Thank you for purchasing the Nexxtech™ Keychain Type Laser Pointer. It combines a keychain and a laser pointer. You can use the laser pointer on a board or project onto a screen at meetings, lectures, classes or seminars. You can use your laser pointer at distances of up to 300 feet (91.4 metres), letting you easily direct your audience's attention.

Warnings:

- Never point the laser pointer at anyone.
- Never look directly into the laser beam.
- Keep the laser pointer away from children.
- Follow the instructions on the laser pointer's danger label.
- Use of controls or adjustments, or the performance of procedures other than specified herein, can result in hazardous radiation exposure.

INSTALLING BATTERIES

Your laser pointer comes with three 357A (LR44) batteries uninstalled. Before using the laser pointer, install the batteries as follows:

1. Remove the battery compartment cap by turning it counter-clockwise.
2. Place the batteries in the compartment with their negative (-) ends toward the front of the laser pointer as shown on the photo.
3. Replace the cap.

When the laser beam dims or the laser pointer stops operating properly, replace with same type batteries.

Warning: Dispose of old batteries promptly and properly. Do not burn or bury them.

Cautions:

- Keep button-cell batteries away from children. Swallowing a button-cell battery can be fatal.
- Use only fresh batteries of the required size and recommended type.

- If you do not plan to use the laser pointer for a month or more, remove the batteries. Batteries can leak chemicals that can destroy electronic parts.

OPERATION

Hold down the On/Off button behind the lens opening to light the laser beam. Release it to turn off the laser.

CARE

Keep the laser pointer dry; if it gets wet, wipe it dry immediately. Use and store the laser pointer only in normal temperature environments. Handle the laser pointer carefully; do not drop it. Keep the laser pointer away from dust and dirt, and wipe it with a damp cloth occasionally to keep it looking new.

Modifying or tampering with the laser pointer's internal components can cause a malfunction and might invalidate its warranty.
